## About Us

As Lydia Marketing, we have been in the cryptocurrency market for about 4 years. We have worked with hundreds of projects and people and we are the most reliable marketing team in the market. We are aware that the resources of our customers are valuable and should be spent correctly, and we provide both marketing and consultancy services to each team. We only speak facts. We would rather lose money than lose the trust of our customers.

## Authorites

Our team consists of 6 people, 3 software, 1 graphic and 2 marketing. You will be dealing with only 1 account on Telegram. This is the account where we have 2 marketing managers. Please beware of fakes. You can confirm that you are talking to the right person on our website and channel.

## **Marketing Strategy**

Marketing strategy in the cryptocurrency market is one of the most important stages of a good software and planning team. You can be strong in software and technical sense. However, as long as you do not promote it to the communities, no one will see your work and there will be no demand.

- 1- Determine what your project aims at.
- 2- Explain this to your community in a simple way.
- 3-Determine a roadmap.
- 4-Be honest with your community and identify moderators that they can reach quickly.
- 5-Keep your social media accounts active.
- 6- Be sure to add marketing tax to your chart and be transparent when explaining it to the community.

**As Lydia Marketing, we will first evaluate your project together.**

- 1-Cryptocurrency project, Meme projects, Metaverse or NFT projects all have separate marketing methods.
- 2-We will not bother you with unnecessary details and work that will waste your resources.
- 3-We will present methods that may be of interest to direct investors and communities within your budget.

**Remember this!**

If you have a good idea and a strong project, there is never a bear market with planned marketing.

Marketers may try to market you something with fancy sentences and unrealistic dreams.

If every marketing strategy works, make sure that the marketers will do it themselves.

Every thought and project is unique to itself. As Lydia Marketing, we preferred to make money by marketing them rather than making money from a crypto money project.

We are aware that as our customers make money, we will also earn.

Please review all our services and let's create a strategy together.

## **Reddit Services**

Reddit is an American social news and discussion site. Users registered to the site can share posts that contain links, texts, photos, surveys and videos, and other users can vote on these posts so that the post goes up or down on the page. Posts on Reddit are created by users; It is shared in sub-groups called "subreddit", which cover different topics such as sports, games, music, food, photography, news. If a post shared on a subreddit gets enough votes, that post will appear on Reddit's home page. Every user registered on the site can create their own subreddit.

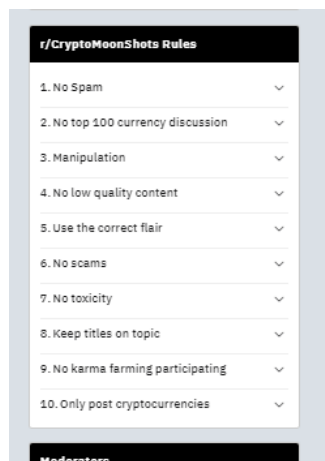

**It has been an important promotional tool for the promotion of cryptocurrencies for a long time. Especially with the Gamestop shares event against WallstreetBet, it has proven to the whole world how important it is between investment commodities.**

In order to publish a post on Reddit and raise this post to the top, we follow the following path, respectively.

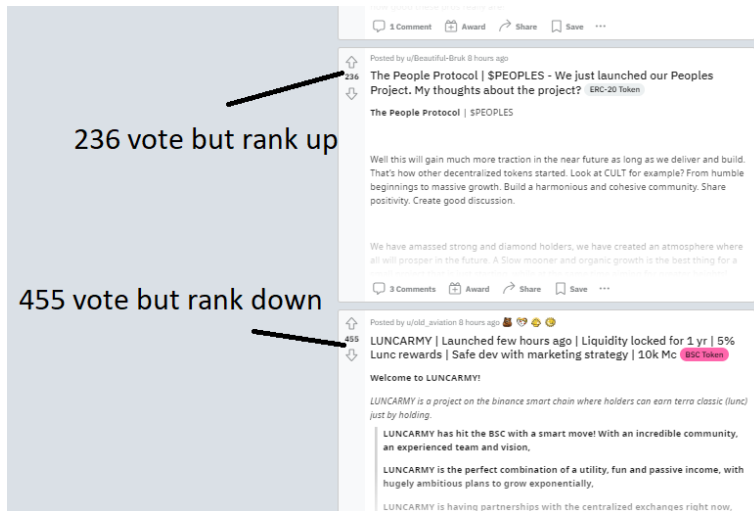

- 1- We are preparing a post that may attract the attention of investors in accordance with the rules and format of Reddit.
- 2- We're sending you a trial for you to review the post and let us know the latest changes.
- 3- We are promoting this post with upvotes, comments and awards

## What you need to know about reddit.

- 1- Each Reddit sub has its own rules set by the moderators. In some subs you can share photos and images, while in others you cannot. We know all the rules and guide you accordingly.

- 2- The number of votes alone is not enough for a post to rank high in the "Hot section" on Reddit. These votes must be sent at the appropriate times according to the reddit algorithm. In addition, this work must be done carefully so that the moderators do not realize that this is a manipulation. Your own efforts result in a waste of effort and time. All our services are under our guarantee.

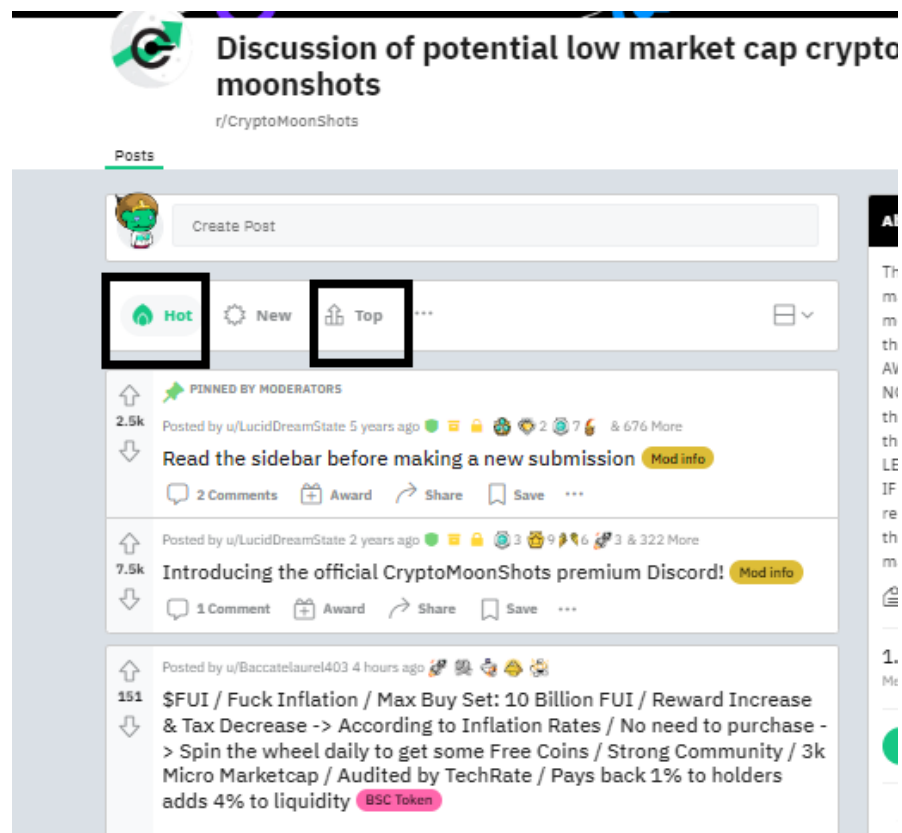

3- Some reddit pages do not allow direct promotion. Especially pages like Cryptocurrency. We can do indirect manipulation on these pages at your request. We prepare a text that will indirectly introduce you, and we carefully rank it up. Despite everything, this may be noticed by the moderators and your post may be deleted. But rest assured that even during this time, thousands of people who are directly interested in cryptocurrencies will see your post. We will also give you 1 more chance even if the moderators delete it. However, if it is deleted for the second time, we will not have a third chance and the job will be considered completed.

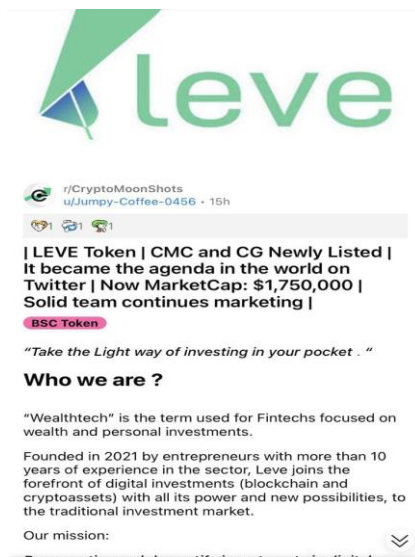

- 4- There are 2 sections on Reddit, Hot and Top. The hot section is the section with hot discussions. Generally preferred. This is because a user visiting reddit is viewing it directly. Another area is the "top section". Here, the number of votes is more important than the hot area algorithm.

5- Not every page on Reddit allows photo sharing. We can still at least enable mobile users photo you want. How Does ? Leave this tip to us and just watch.

## Twitter

Our Twitter services.

- 1- We can quickly increase your number of followers.
- 2- We can send Like, Rt and comments to your posts.
- 3- We can move you to the 1st place with the votes we will give in a poll on Twitter.
- 4- We can make the tag you want on the agenda all over the world.

## Twitter trending services.

We put the hashtag you want on the world agenda within minutes.

In addition to the world agenda, we give the USA, Spain, Brazil and Turkey agenda as a gift.

### What do you need to do ?

1- Send us the patient you have determined.

2-Optionally, send a tweet with hasag. We will support this tweet with like, rt and comments. When people who are curious about your agenda enter the tag, they will first encounter your promotional message.

3-Determine the trend time.

4-Sit back and enjoy the investments.

### Some examples of twitter trends

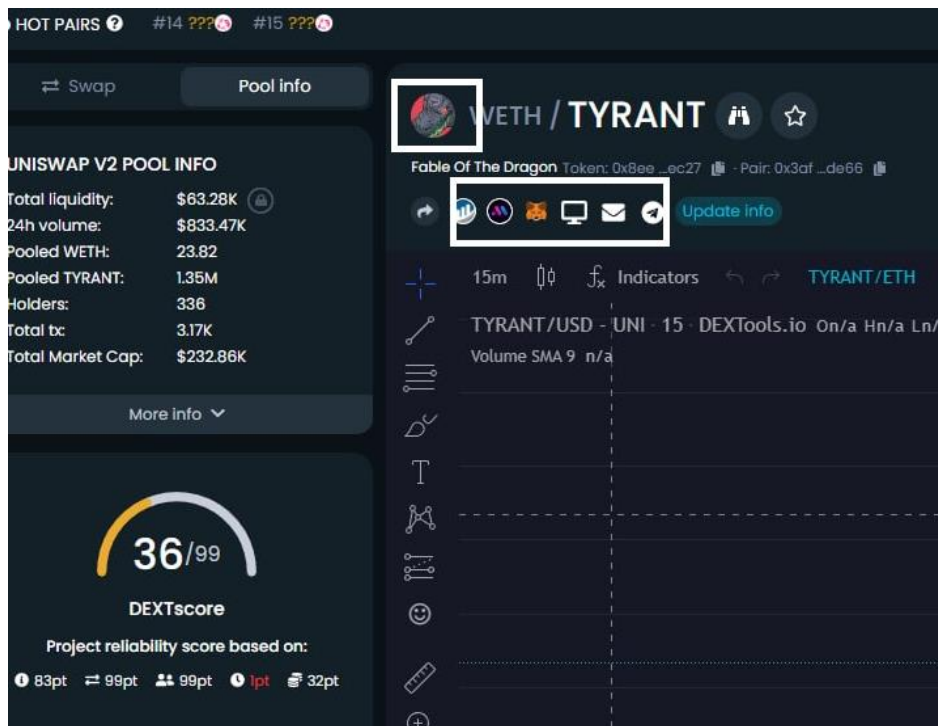

## Dextool Services

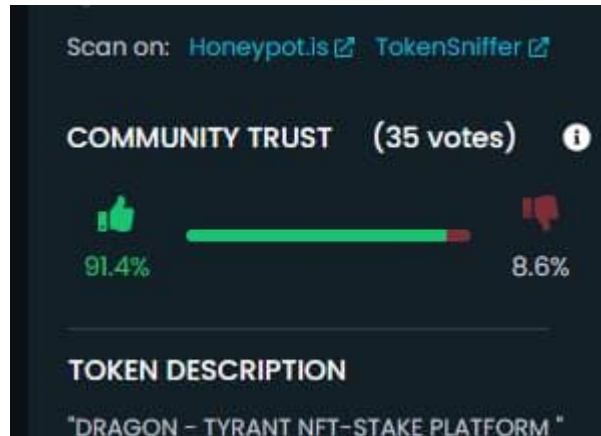

Dextool is a decentralized exchange with millions of dollars in daily volume. It can be visited by many investors daily and has garnered the market's confidence for years. Projects can add liquidity on the stock market and share their own dex page with their investors.

### What can we do in Dextool?

- 1- We can update your logo and link information on your Dextool page. This will also increase your dexscore.

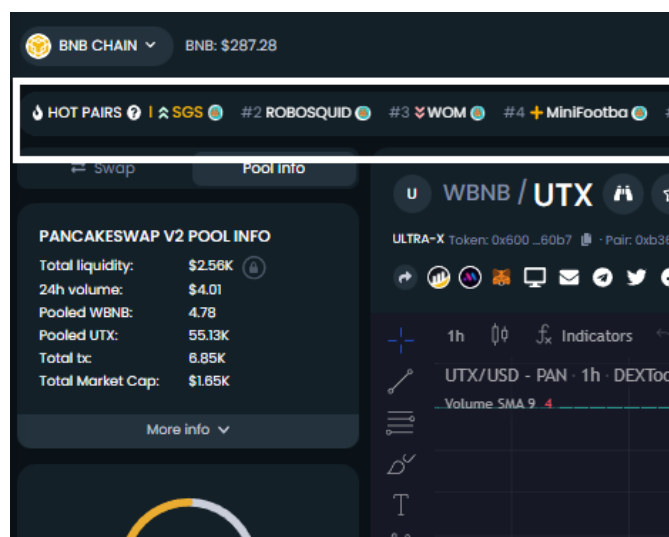

2-We can increase your "Community Trust" votes over 90%.

3-We can take your project to the trend area. For this, your project needs 50k liquidity and over 100k volume. Hints on this will be given.

*\*Your project does not need to be kyc and public.*

4-We can rent the live trend area for you at affordable prices. For many times it is a more appropriate method than the daily trend

*\*Your project must be kyc and public.*

# CoinMarketcap / Coingecko

Listing a project on Coinmarketcap and Coinecko is one of the most important factors affecting the reliability of that project by investors. Coinmarketcap and Coingecko listings have been creating excitement in the cryptocurrency market for many years. Cmc and Cg are supported by the binance exchange. Therefore, we can understand how important a Cmc and Cg listing is for stock market listings.

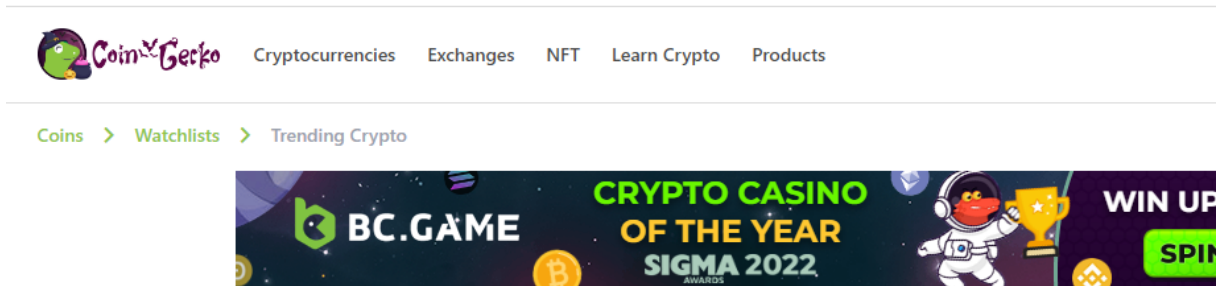

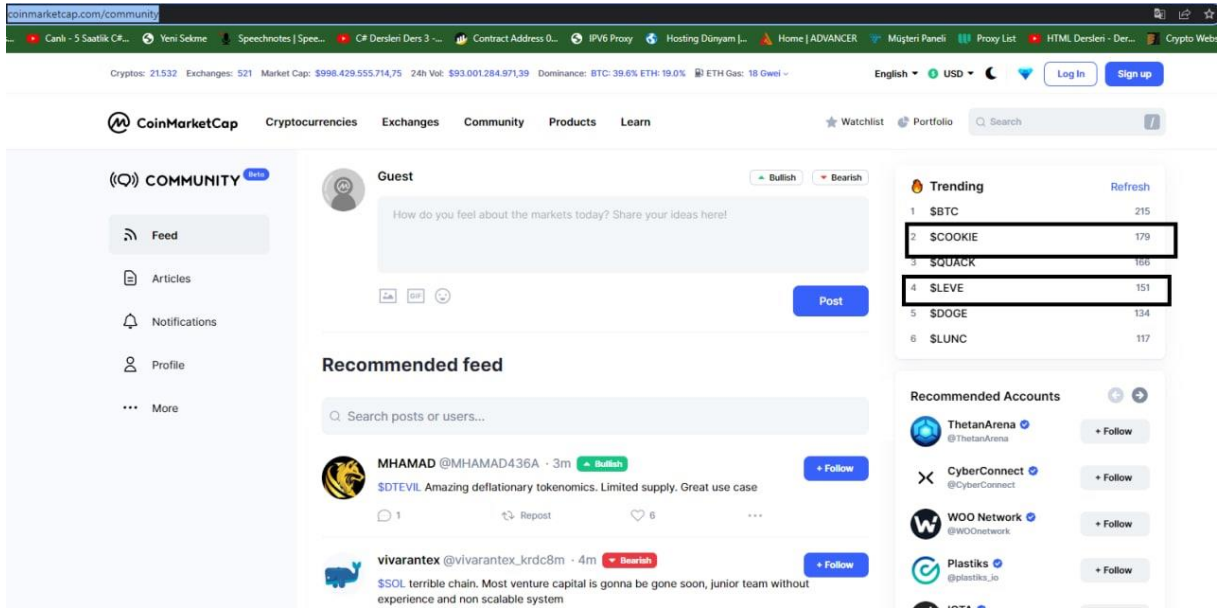

What can we do in Cmc and Cg?

1- \*We can list you on these platforms.
